

South Tampa System Upgrades | ZONE R

Timing: March 2026

Streets:

- S Manhattan Ave
- S Swann Cir
- W Swann Ave

You may notice temporary disruptions, including minor traffic or access inconveniences. Safety is our number one priority, and construction areas will be properly marked and barricaded.

What We're Doing:

- Installation of new flow valves and service regulators at each residence with natural gas service. Your natural gas service may be interrupted.
- Pressure testing of all new and upgraded pipelines to ensure reliability and safety.
- Carefully reintroducing gas into the newly upgraded systems after thorough testing.
- Restoring all work areas including disturbed sidewalks, driveways, or landscaping to original or better condition.
- Relighting gas appliances. An adult aged 18 or older must be home to complete the relights. If we cannot connect with you, we will leave a door hanger with instructions for you to call our customer service center at **877-832-6747** to schedule an appointment.
